

The quickest, simplest, most accurate and secure EPOS system available... anywhere!

## EPOS System

### Why the quickest?

Q-Bar's unique personal hand units allow staff to register any drink, anywhere. Operators enjoy reduced serving times by up to 40%.

### Why the simplest?

The process could not be easier. Each product is represented by a bar code - located by the product! Easy to find - avoids mistakes. Swipe the bar code as you pour each drink, show the customer their total, collect payment and fire the transaction into the micro till.

### Why the most accurate?

Every transaction is displayed in real time in the back office. Bar totals may be monitored at any time along with staff performance, hourly sales analysis and individual product activity totals. Graphical analysis is a standard feature.

### Why secure?

Individual sales staff and transactions are monitored in the system. The hand units retain full trading history and have rechargeable batteries operating up to 100 hours continuously. Incorrect operation along with total system failure is virtually impossible.

# EPOS System

- Exceptionally fast and simple operation - max 2 second transaction time at till per round
- Minimal staff training (approx 15 mins)
- Up to 4 price levels available
- Member and non-member prices
- Low purchase and on-going maintenance cost
- No bulky or complex hardware on the bar
- Each hand gun can identify any staff member
- Full statistical and analytical reports
- Graphical analysis

- Hand gun can operate stand alone - data retrieval by PC after sales session
- Easy to change prices
- Can operate off-line
- Password protected
- Modular design - add units as required

## Comprehensive reporting and system monitoring

Integrates fully with stock control applications
